REGULATION CHANGES &
WHAT THEY MEAN TO MERTON GROUP CUSTOMERS

CLP is replacing the long standing CHIP (Chemicals Hazard Information and Packaging for Supply) Regulations.
This is our simple explanation of what that means to you...

REGULATION CHANGES & WHAT THEY MEAN TO MERTON GROUP CUSTOMERS

WHAT IS CLP?
“CLP” is short for a very long EU Regulation, both in its title and its content! Its full name is:

European Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of substances and mixtures came into force on 20th January 2009 in all EU Member States, including the UK. It is known by its abbreviated form, ‘the CLP Regulation’ or just plain ‘CLP’.

The CLP Regulation adopts the United Nations’ Globally Harmonised System on the classification and labelling of chemicals (GHS) across all European Union countries, including the UK. As GHS is a voluntary agreement rather than a law, it has to be adopted through a suitable national or regional legal mechanism to ensure it becomes legally binding. That’s what the CLP Regulation does.

CLP is replacing the long standing CHIP (Chemicals Hazard Information and Packaging for Supply) Regulations.

WHAT EFFECT WILL THIS HAVE?
The new regulation means an update to the labelling of chemical products.

Pictograms like these -

Are replaced by ones like these -

Accompanying descriptive indicators like ‘Harmful’ or ‘Flammable’ will become simpler with replacements like ‘Danger’ and ‘Warning’.

Risk and Safety Phrases will change to Hazard Statements and Precautionary Statements, some of which are quite similar to their predecessors but there are also many new phrases.

It also means that all Product Safety Data Sheets will be updated with new information. This information will now be longer and more comprehensive.

DON’T PANIC!
You will see more symbols, more often. Products that previously had no symbol may now include the Health Hazard Symbol due to most products being irritable to eyes. None of the products have changed but under new CLP Regulation they may now include more information on their labels but that is nothing to worry about.

DATES AND TIMING -
CLP classification is now in force. It started June 1st 2015.

That means -

• Manufacturers must now produce products with new labelling and MSDS (Material Safety Data Sheets).
• Distributors have 2 years (until 1st June 2017) to supply old labelled stock.
• End users are not affected by the changes and can continue to use products they have for as long as they last, according to their shelf life of course.
• Merton Group will supply CHIP labelled products until stock naturally replenishes with new CLP versions.
• Merton Group’s website will be updated with new MSDS as required.
